

Quick Comparison of Storm Strips vs. Competitors

Aluminum retainer is 5 to 7 times thicker than others preventing damage from heavy use. Oversize foam seals flex to accommodate warps, dents and twists in any door. The unit can be adjusted to doors that are up to 1" away from door stop. Foam seals can be removed to paint doors. (Requires special knowledge.) Mitering or notching is not required.

Requires mitering to install. Needs adjustments twice a year. Cannot replace insert. Cannot paint door without removing.

Needs adjustment twice a year. Cannot replace the insert. Cannot paint door without removing.

Requires mitering to install. Cannot replace insert. Cannot paint door without removing. Very thin metal is easily damaged.
